

Expand M2

Bring your message to your target audience.

With a few simple steps, the graphic and media roll can be removed and easily exchanged with a new message.

The Expand M2 is manufactured from the highest quality materials and has a sleek, simple design. The smart, telescopic pole allows you to quickly adjust the height of your message without tools.

Expand M2

The aim of the Expand M2 was to set a new standard in portable media systems. We have used a technology inspired by solutions found on racing yachts and invented the unique Modular Tension System (MTSTM). The MTSTM is designed to generate tension as you pull the graphic up which

makes retracting the media a breeze. We have wrapped this technology and ease of use into a sleek alloy shell. The Expand M2 comes in a stylish nylon bag and can be set up in 30 seconds. An optional halogen light is available to illuminate your message.

Width: 33 7/16" (85 cm)
Adjustable Height: 63" to 88 5/8" (160-225 cm)
Colors: Black or silver
